

*A litigation database and more, IPRO Eclipse gives you the power of a database and allows you to effectively control all aspects of your case—from capture to production—through a single Discovery Management application. Focus on the case, not the technology.*

### Value

- Manage the capture, review, analysis, and production phases of the case from a single application
- Easily consolidate all documents and data into a unified view of the case
- Fully Unicode compliant multi-language support
- Reduces the cost of ownership by eliminating the need to manage multiple technologies

### Flexibility

- Utilizes the IPRO Database or Microsoft SQL Server
- Appropriate for cases of all sizes, big or small
- Configurations for standalone workstations or for a company-wide implementation
- Can be used out of the box with default settings or configured for advanced environments

### Control

- Access based on user roles, groups, and additive privileges
- View and update restrictions at the field and tag group levels
- Active Directory Support
- Dashboard monitoring of cases and the batch review progress

- PROCESSING
- REVIEW
- PRODUCTION

#### IPRO Eclipse key features:

- Multi-language support - fully Unicode compliant
- Supports both electronic and scanned documents
- Set up Smart Folders to organize documents by tag and file type, including the ability to set tag group rules to customize review workflow
- Drag and drop your documents into folders
- View document boundaries
- View document relationships up to 8 generations deep
- Tag children, parent, and sibling documents up to 8 generations deep
- Use the Search Wizard to easily search the case
- View TIFF, HTML, Native, OCR, and Transcript files concurrently from a single interface
- Perform page and document level tagging

IPRO Eclipse is a Discovery Management application that easily consolidates all the case files and data into a unified view. It includes functionality to address the capture, review, analysis, and production phases of the case.

IPRO Eclipse was developed from the beginning to manage your multi-language (Unicode) files and large databases. It utilizes the newest technology so that it will continue to deliver the solution you need in the future.

You no longer have to pass your data between multiple applications and multiple databases during the litigation process. This ensures data integrity throughout the process and it simplifies your data management tasks.

#### The primary components of IPRO Eclipse are:

- **Databases:** Utilize the IPRO database or Microsoft SQL Server
- **IPRO Eclipse Desktop** for accessing case documents and data
- **IPRO Eclipse Review Management** provides the ability to create and manage document batches through multiple review passes and customized tag group rules
- **IPRO Eclipse Dashboard** for real time reporting on case and batch activities
- **IPRO Eclipse Production** to endorse and produce documents
- **IPRO Eclipse Printing** to manage the printing of large document collections locally and remotely
- **IPRO Eclipse Discovery** for electronic document discovery processing
- **IPRO Eclipse Scanning**, full featured scanning capability to transform paper documents into images
- **IPRO Eclipse API**, an open API to enable integration of other applications
