

# **IPRO eCapture Testimonials**

*IPRO eCapture completes ESI projects faster with less cost.*

*"We have had amazing results with eCapture during the last 18 months...It has found cleverly hidden and embedded files that other solutions skipped over and recently, for a London law firm, we loaded 7Gb of data into it consisting of some 370,000 pages. The client wanted us to filter by date range and then key names and words. Having done so, we rendered just 35 pages (7 docs) that needed to be reviewed. The whole process took just a few hours and the law firm, as well as their clients, were delighted at the time and cost saving."*

**Terry Harrison**  
**Managing Director**  
**Hobs Legal Docs**

*"We had seven days to process 40 GB of ESI and manage a multi-state, multi-party review by our client, outside counsel and opposing counsel. We often face tight deadlines, but none of these parties had reviewed documents online. In this case, a complete IPRO solution made the most sense. IPRO eCapture is a scalable processing tool, and migrating data from IPRO eCapture to IPRO eReview is seamless. We also knew our clients could use IPRO eReview with minimal up front training."*

**Principal**  
**Digital Legal Tampa**

*"By utilizing the SaaS format of eCapture, I was able to harness the capability of e-Capture almost immediately. The software worked exactly as promised and I was able to complete the project much more efficiently."*

**Sidiki Bagayoko**  
**Director of Litigation Support**  
**Technology/Managing Partner**  
**Tampa Legal Copies**

*"After evaluating 7 industry leading products, TERIS (formerly ALC Legal Technologies) selected IPRO eCapture as its primary e-Discovery processing 'Tool of Choice'. IPRO eCapture is the ideal processing application with its rapid search capability, superior QC module, and excellent customer support. eCapture is an all-in-one EDD tool that handles most of our processing and export needs and its efficient self-distributing process means we can trust the project is running smoothly, without having to monitor worker stations"*

**Peter vR Sternkopf**  
**CTO**  
**TERIS**

*"IPRO's eCapture application is beyond a shadow of a doubt the most robust and complete off the shelf EDD processing application on the market. We have tested and purchased several other EDD applications over the years, and nothing compares to eCapture. Many EDD applications claim to be 'enterprise grade' but when it comes down to it, they simply can't handle the volume. Not eCapture. We have processed literally hundreds of GB in a span of just a few days, quite often. Support is top notch, and the backend SQL database is well written."*
