

# ProSearch Receives 2020 Ipro eDiscovery Innovator Award, Legal Service Provider

- Truly Harnesses the Power of Artificial Intelligence
- Applies A Data Science Approach to Keyword Searching
- Combines Linguistics, Analytics, & Data Science

Ipro Tech, LLC, a global leader in eDiscovery and Trial software technology, is pleased to announce the winners of the 2020 eDiscovery Innovator Awards, given during the annual Ipro Tech Show, hosted this year at Arizona State University's Sandra Day O'Connor College of Law.

This year's winner in the legal service provider category is ProSearch. Not only are they incredibly capable on core processing capabilities and are so well ingrained with what clients do as a business, they are truly pushing the envelope on how to deliver more value to customers using artificial intelligence and machine learning.

As Dean Brown, Ipro CEO, stated at the award ceremony, *"ProSearch has processed over eleven and a half petabytes of data in the last few years. Petabytes. This is three to five times more information than the Library of Congress holds in its entire digital collection. This is an incredibly capable team doing things that are well beyond what you would expect from a legal service provider. I come away fascinated and amazed every time I hear about what they are doing."*

The team from ProSearch responded to the award by saying, *"We've been partners with Ipro for many years, and a lot of our success comes from that partnership. Their powerful platform has allowed us to automate job management and ultimately process a lot of data for our clients with flexibility, customization, and consistency. And the Ipro support staff and engineers have been with us every step of the way, helping us to solve challenges, explore new questions and new ideas. We're very thankful."*

*Thank you to every one of our 4000+ customers for your innovative spirit and continued leadership in the eDiscovery industry.*
